Beauty TIPS

PUFFY EYES

Place a slice of potato over each closed eyelid and relax for a few minutes. It absorbs excess water and helps eliminate puffiness.

USE OIL ON YOUR SKIN... EVEN IF IT'S ALREADY OILY

This probably sounds crazy, but using an oil-based product to remove makeup or excess dirt from your skin can actually improve your epidermis' condition. Why? Over-cleaning stimulates the sebum glands, which causes skin to over-produce oil. Using oil-based products will have the opposite effect.

COCONUT OIL

100% Pure Coconut Oil is a great moisturizer for your scalp. Apply, wrap it for 20 minutes, wash and condition.
